Skills

JavaScript • Python • CSS • HTML • React • Redux • Sequelize • API rendering • Express • Node.js
GitProjects • Passport • Postgres • Bootstrap • Semantic-UI • Material-UI • Team Management

Projects & Work History

[NADA-POS](#): Completed December 2020 - [Github](#)

- A replica of a restaurant point of sale system using react-redux.
- Wrote complex logic for the first end that allows specific employees to access specific functions.
- Made to be fully responsive, so that servers could enter orders from their phone.
- Created a database that includes five separate tables that all have relationships.

[The Thorge](#): Completed November 2020- [Github](#)

- A character builder for Dungeons and Dragons fifth edition using react-redux using Semantic-UI for styling.
- Allows users to choose from a variety of character choices rendered on the page via an API.
- Uses redux to handle state interactions in novel ways.

[Your Favorite](#): Completed October 2020 - [Github](#)

- A recipe creation app created in Node.js using Bootstrap for styling. Allows users to input what ingredients they have, and then personalizes recipes for them.
- Utilizes a complicated API to render specific recipe cards that link to various recipes.

March 2018 - November 2020

Beer Garden – Barstaff

- Delivered in-depth training to workers in food preparation and customer-facing roles to promote strong team performance.
- Organized special events in the restaurant, including receptions, promotions and corporate luncheons.
- Led and directed team members on effective methods, operations and procedures.

Education

May 2015

Indian River State College – Bachelor in Human Services

- An educational program focused on professional interactions, specifically within the realm of psychology.
- Conducted independent studies into death row mitigation.

December 2020

DigitalCrafts

- A full-time educational program with an emphasis on web development and software engineering.
- Shored up basic knowledge on languages such as JavaScript and Python.
- Dove in depth into cutting edge frameworks such as React and Redux, and server-side technology such as PostgreSQL, Express, and Node.js.
